

11i/2.6 E-Business Functional Workflow Fundamentals

Duración: 2 Días

Lo que aprenderá:

The primary objective of this course focuses on how Oracle Workflows embedded in the Oracle eBusiness suite can be modified. Students will learn how to design a simple workflow process and how to administer that process.

Following this introduction, students will then learn how to retrieve workflows embedded in the eBusiness suite, make modifications and then load those modified workflows back into the eBusiness environment. Demonstrations and hands-on practices reinforce the fundamental concepts. Note: The target audience for this course is a Functional Implementer.

This course is not intended as an alternative or replacement for Technical audiences who are looking for a course that covers the full architecture and features of Oracle Workflow.

Technical audiences should enroll in the following course: 11i/2.6 Implement Oracle Workflow.

Prerrequisitos recomendados:

11i Procure to Pay Fundamentals
Order to Cash Fundamentals
