

11i/2.6 Implement Oracle Workflow

Duración: 5 Días

Lo que aprenderá:

This course provides an overview of the architecture and features of Oracle Workflow and the benefits of using Oracle Workflow in an e-business environment. You can learn how to define event subscriptions to perform processing triggered by business events and how to design workflow processes to automate and streamline business processes.

Students also learn how to write custom PL/SQL procedures for use in workflow processes and what setup steps are required for Oracle Workflow. Demonstrations and hands-on practice reinforce the fundamental concepts.

- Define event subscriptions
- Write custom PL/SQL procedures
- Design Workflow processes

Audiencia:

Business Analysts, Functional Implementer, Technical Consultant

Prerrequisitos Recomendados:

Suggested Prerequisites

Thorough knowledge of Oracle Database and Oracle Application

Knowledge of Oracle Workflow with Oracle E-Business Suite

Working experience with XML

Objetivos del curso:

- Describe how Oracle Workflow with the Business Event System enables business process definition, automation, and integration
- Design a workflow process using Oracle Workflow Builder
- Respond to notifications and monitor the status of a runtime workflow process
- Define subscription-based processing for business events
- Implement advanced workflow process design features
- Write custom PL/SQL procedures for use in workflow processes

- Set up and administer Oracle Workflow for a site

Contenido del curso:

Defining Workflow Processes

- Planning a Workflow Process
- Diagramming a Workflow Process
- Defining Item Type Attributes and Lookup Types
- Defining Messages and Notification Activities
- Defining Function Activities
- Defining Event Activities

Monitoring Workflow Processes

- Testing Workflow Processes
- Reviewing the Status of Workflow Processes

Viewing and Responding to Notifications

Oracle Workflow Directory Service

Defining Business Event System Processing

- Business Events
- Event Subscriptions
- Systems and Agents

Workflow Engine

- Forced Synchronous Processing
- Master/Detail Coordination Activities

Oracle Workflow APIs

- Workflow Process APIs
- Business Event System APIs
- PL/SQL Documents
- Selector/Callback Functions

Error Handling

Customizing Workflow Processes

Setting Up Oracle Workflow

- Workflow Loaders
- Setup Steps

Workflow Administration with Oracle Workflow Manager

- Managing Service Components

Managing System Status and Throughput
