

R12 Oracle Procurement Contracts Fundamentals

Duración: 3 Días

Lo que aprenderá:

In this course, students learn about implementation considerations and set-up steps related to R12 Oracle Procurement Contracts. Students also learn how to author contracts and contract terms and templates, as well as Procurement Contract integration points across the Oracle eBusiness Suite of applications.

Students learn how to create contracts based on Purchasing documents such as purchase orders. They also learn how to create and manage stand alone contracts known as "repository contracts", which do not have to be related to purchasing documents. Students also learn how to process contracts through the contract lifecycle which includes taking part in contract negotiations, signing contracts, and closing out contracts. Students are also able to experience, through practices in the classroom, the powerful integration with other Oracle Procurement applications such as Purchasing, Sourcing, iProcurement, and iSupplier.

- Set up and Implement R12 Oracle Procurement Contracts
- Progress a contract through it's lifecycle
- Manage the Contract Terms Library

Audiencia:

End Users, Functional Implementer, Sales Consultants, Support Engineer

Prerequisitos Sugeridos:

Thorough knowledge of Oracle Applications

Working experience with Oracle Applications

Objetivos del curso:

- Identify the Steps Required to Implement Oracle Procurement Contracts
- Explain Clause Migration and Import Functionalities
- Describe Dependencies on Other Applications
- Manage Repository Contracts
- Describe Oracle Procurement Contracts
- Author Contracts
- Manage Contract templates

- Use Contract Expert
- Author Contracts from Oracle Purchasing
- Manage Supplier-authored Contracts
- Manage Contract Negotiations from Oracle Sourcing
